

AQUASTEP is designed with wet areas in mind – your bathrooms and laundry. If you would like the warmth and feel of wood flooring in your wet areas then AquaStep is for you. Very few floor coverings are warranted for floods, but AquaStep is!

Apart from being 100% waterproof, AquaStep is quieter to walk on than a standard laminate. It can be wet mopped (standard laminates are recommended damp mopped) making AquaStep even more easy to maintain. AquaStep is as ideal for the family living areas as it is in the wet areas where you want the visual appeal and comfort of a timber floor. Like our other laminates AquaStep is easily DIY and being Uniclic, it is easier to install than ever.

If you are looking for a floor with authentic designs, a perfect quality and simplicity in installation and care, then laminate flooring is your best option.

Natural Oak AQNO4V

Wenge AQWE4V

Kembel Teak AQTK4V

Antique White AQAW2V

Quality European Laminate Flooring

FLOORSCAPE
 The Timber and Laminate Flooring Company

Why is Laminate Flooring so good?

Hard wearing and excellent warranty

– **10 to 20 year wear warranty** – you will not wear through the surface layer during the period of the warranty in a domestic environment

Dent & scratch resistant

– does not mark and dent as easily as wood
– great for high heels and dogs.

Fade resistant

– laminate flooring is resistant to the harsh effects of the sun and laminate does not change colour over time like wood.

Consistent colour

– unlike wood which has extremely different shades and colours and grain structures. Laminate has colour and grain variation designed into the flooring to look natural.

Environmentally Friendly

– laminate floors do not deplete the worlds limited and natural resources. These brands are all PEFC certified.

These Quality European Laminate floors compliment the interior design chic of tomorrow; ready to install in your home today. You can install these floors on your own with minimal time and effort. Laminate flooring is one of the hardest wearing floor coverings money can buy, and come in a range of realistic wood designs without the traditional shortcomings of timber floors. Laminate floors are harder wearing (scratch, impact and fade resistant), require less maintenance, do not change colour and are suited to the demands of family living areas such as kitchen, family, dining rooms and heavy traffic areas of your home.

Uniclic Quality European Laminate Flooring -

1. No Glue needed to install the floor thanks to the Uniclic system
2. A faster and neater job with Uniclic jointing system
3. Start wherever you like in the room and lay in any direction you like
5. Improved resistance to moisture
6. Recyclable - PEFC
7. Ready to walk on immediately
8. Possible to uplift your floor and re-install
9. 10-20 year wear warranty
10. Full range of underlays and accessories are available
